EDUCATION

B.Tech-Computer Science and Engineering
Vardhaman College of Engineering

11/2020 - 08/2024   *6.3CGPA*

Course
- Computer science and engineering

Intermediate
Sri Chaitanya Junior Kalasala

07/2018 - 06/2020   *63%*

Courses
- MPC

School
Dr kkr's Gowtham school

03/2018   *8.5*

PROJECT EXPERIENCE

Mobile price prediction using machine learning
Minor project

07/2023 - 11/2023

Achievements/Tasks
- This project is to develop a categorization model that, in response to a set of requirements, can predict the price range of mobile phones.
- Developed a machine learning model to predict the price range of mobile phones based on technical specifications such as RAM, battery power, and processor speed.
- Collected and preprocessed data to improve model accuracy, implementing feature selection and scaling techniques.
- Utilized algorithms like Classification, Decision Tree, Random Forest, and SVM to compare performance and optimize model results.

Automatic insurance claim using block chain
Major project

11/2023 - 04/2024

Achievements/Tasks
- I have developed a project that can be done in online only that the automatic insurance claim in online.
- The user should keep the images and videos of the accident to claim the insurance, then it will check that the claim is real or fake then the process will go on.
- After checking the all documents the claim will be proceed.

SKILLS

Java   Python   Web development

Cloud computing   AWS

mobile application development

ACHIEVEMENTS

Published research paper entitled "mobile price prediction using machine learning"

Published research paper entitled "Automatic insurance claim using blockchain" at 2024 ICACCS

CERTIFICATES

Web development and design (06/2022)

Agile methodologies (09/2023)

Web development (10/2023-11/2023)
